To Whom It May Concern,

I have known Jennifer since 2013 through association with her mother, my friend. I am a Cardiology nurse practitioner in the State of Colorado. I am writing on behalf of Jennifer Edwards Emmi.

I have always been amazed and impressed by Jennifer. I have witnessed her graciousness, optimism, passion, outgoing personality, adaptability, compatibility, trustworthiness, and kindness to others. She is loyal and very honest individual with excellent integrity. She has had a genuine concern for others and animals and gives her whole heart to making their world better. She has portrayed excellent citizenship with a good moral character. She is extremely intelligent and has been an active lawyer in her leadership, drive and determination for those who cannot defend themselves, animals and their humans who love them. She has advocated for them, taught Law School classes for animal rights, been a speaker, lived her life supporting injured animals and nursing them back to health and giving them a better life, and helping others develop the human-animal bond through needed animal therapy and wellness. She has out reached to children with disabilities bringing them the love and bond only an animal can offer them. She had loved having elderly disabled women and men come experience the bond and love an animal can share with them as well.

She is a wonderful mother, devoted, loving, with upmost patience, putting their needs above her own and being present with them their entire lives. She had been present at every school event and always concerned regarding her children's health and being their main present parent in their upbringing. Her children are her reason for living. I have babysat for one of her children and witnessed the care and concern for each of them. She has been stable and active in her children's lives, never wavering in her love and support for them.

I have also been a witness to her struggles with ongoing health issues with the loss of her vision from Lupus and the other maladies and struggles this disease presents. She has the "never give up" mentality, staying focused, positive and strong for her children and has never shown them weakness that some days may present. She displays belief in optimism as being the cure.

I feel blessed that I have been able to come to know Jennifer and she is truly a remarkable woman.
