To Whom It Concerns:

I have known Jennifer Emmi and her Mother, Barbara Crist for nine years. They have been very close friends and we live in the same community.

Jennifer is a very dedicated and generous person. She reaches out to offer help and friendship to many different circles of people.

Jennifer is a passionate supporter of animal rights and uses her legal background and her ranch to support many organizations. She has rescued abused animals from all over country and given them care and shelter at her ranch. She has initiated education and care programs for senior citizens, school children and veterans. She is an outstanding person who has reached out and made a difference in this community.

I have been involved with and supported Jennifer with her medical challenges and needs over the past years. And I have witnessed how difficult, serious and debilitating they have been. I have watched Jennifer's medical condition deteriorate over the past year due to insufficient medical care. We live in a community where neighbors are close and supportive of each other. We are committed to being available to support Jennifer with any of her needs from driving to appointments, prescriptions, meals and anything else that is necessary.

I have never seen or known Jennifer to hurt or degrade any person. I have always known her to be kind and reach out to me and her friends and many others in the community when in need. Jennifer is a good friend and inspiration dedicated to making a difference in this world.

Thank You.
